A Report on Science Exhibition

On the eve of 'National Science Day' on February 28, 2019, Ramakrishna Mission High School has organized a Science Exhibition in the school campus. Nearly 100 students participated and exhibited different models, experiments and charts related to Physics, Chemistry, Biology and Mathematics. The students very spiritedly explained to the visitors the underlying laws, principles and concepts of the exhibits. Monks of Ramakrishna Order, parents and teachers visited the exhibition halls, keenly observed all the exhibits and encouraged the students. The school has also arranged science video shows for the children. The entire atmosphere of the school reverberated with the spirit of science for the entire day.
